DETAILED ACTION

Allowable Subject Matter

1. Claims 1-3, 6-17, 20-23, 26-37, and 40 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach or make obvious the steps of or means for **"determining, based at least in part on said update information and the routing tree information reported by said first router, whether said second router is to transmit update information so that all members of said multicast group remain connected, by determining if said source tree reported by said first router has said second router as a root of a subtree from which said first router is excluded, and if at least one neighbor router of said second router in said subtree is not a member of said multicast group"**, when the determining is considered within the specific structure of the method recited in claim 1 or the device recited in claim 21. The prior art of record fails to teach or make obvious the steps of or means for **"determining whether said first router is a next hop in a shortest path from said second router to the source of the multicast packet according to said source tree"**, when the determining is considered within the specific structure of the method recited in claims 14 and 20 or the device recited in claims 34 and 40.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
